3 Pack Only

\$7.99

Diabetes, as everyone knows, can lead to other medical issues. Foot ailments are among the most problems associated with diabetes. With diabetes the risk of foot ulcers increases drastically as well as poor circulation, loss of sensation and delayed wound healing. Providing your feet with the proper support and comfort can make a big difference. Diabetic socks are a simple, easy and convenient way to help keep your feet healthy.

Diastar™ Comfy Feet™ Diabetic Socks are designed to control moisture and thereby reduce the risk of infection and bacterial growth. Made of cotton blends, diabetic socks are softer and more skin friendly than regular socks and extra thickness provided added cushioning safety and comfort.
