

Pharmaceutical Specialties, Inc. (PSI) develops and manufactures skin care products for people who need, or want, to avoid many of the common chemical irritants found in ordinary skin care products.

The entire non-prescription product line is free of common chemical irritants. Because we leave these offensive ingredients out of our products, they may be used by those with either normal or sensitive skin.

These products are routinely recommended by dermatologists and other physicians for patients with dry, irritated skin, such as "winter itch" and other dermatologic problems including psoriasis, atopic dermatitis (eczema), contact dermatitis, and ichthyosis.

Belew Drug carries the entire product line: Free & Clear™ Shampoo and Conditioner, Free & Clear™ Hair Sprays, Free & Clear™ Liquid Cleanser, RoBatho™ Bath Oil, Vanicream™ Cleansing Bar, Vanicream™ Skin Cream & Lite Lotion, Vanicream™ Sunscreens, Vanicream™ Lip Protectant and Vittec™ Vitamin E Lotion.
