

A **BIG** WELLNESS PROGRAM FOR LITTLE ONES
12 AND UNDER ON TENNCARE

We're here to help you care for your child's health

With a collaborative practice agreement, our pharmacists can provide essential over-the-counter products to help keep your little one healthy and treat common issues like allergies, fevers, or diaper rash. These items are available at no cost to you through your insurance and can be picked up right here at the pharmacy, no doctor's visit required. It's a simple way to get the care and support your child needs, when you need it!

How It Works

- Parents/guardians can stop by our pharmacy with the child, and we will obtain your child's medication history, weight, and a list of allergies. We may then offer the selected items on this form, written as a prescription
- Items listed may be refilled once every 30 days
- Parents/guardians can set up refills for monthly pickup or ask for refills as needed
